

WHICH BRAINBOX SAID "KNOWLEDGE IS POWER?"

A. HERBERT SPENCER B. ALBERT EINSTEIN C. SIR FRANCIS BACON D. ABU BAKR E. BENJAMIN FRANKLIN F. THOMAS BERGER

PLEASE VOTE NOW.

How do you know if you've got everybody's attention?

Usually you don't. But by giving everyone in the room their own keypad and asking them to press the button to answer a question, you're guaranteed 100% involvement.

And instant feedback. We felt it was important that you could choose whether to display results instantly - or save them for later. And whether to identify respondents or not.

Which means Activote for PowerPoint® can be used in a number of ways. At the start of a session to break the ice or find out more about what people already know. (And that means you can find out about everyone in the room rather than just those that like to take over.)

Later on, to build rapport, facilitate discussion or assess understanding. Maybe even to obtain feedback and evaluation on a session. Or simply to add fun to the driest of subjects.

So how does it work? Each individual gets a wire-free handheld device that is registered to a pc. The software plugs straight in to Microsoft PowerPoint® and there's a familiar Question Wizard to help with setting up question slides. (You can choose between multiple choice, yes/no, true or false or offer a sliding scale for gauging opinion.)

When you're ready, the group use the voting keypads to choose from up to six choices and register their answer.

Plus everyone gets their say. Activote for PowerPoint® uses radio technology that works from anywhere in the room without requiring line of sight.

It also means less paperwork. You can export results to Microsoft Excel® spreadsheets and save both questions and answers for reference later.

You'll also be relieved to know it doesn't cost the earth. We wanted it to be accessible. So it is.

ACTIVOTE FOR POWERPOINT.®

BRINGING PRESENTATIONS TO LIFE THROUGH AUDIENCE RESPONSE.

COMPLETE WITH
